PART III REASONS FOR ALLOWANCE

1. In view of the appeal brief filed on 9/5/08, PROSECUTION IS HEREBY REOPENED. New grounds of rejection is set forth below.

To avoid abandonment of the application, appellant must exercise one of the following two options:

(1) file a reply under 37 CFR 1.111 (if this Office action is non-final) or a reply under 37 CFR 1.113 (if this Office action is final); or,

(2) initiate a new appeal by filing a notice of appeal under 37 CFR 41.31 followed by an appeal brief under 37 CFR 41.37. The previously paid notice of appeal fee and appeal brief fee can be applied to the new appeal. If, however, the appeal fees set forth in 37 CFR 41.20 have been increased since they were previously paid, then appellant must pay the difference between the increased fees and the amount previously paid.

A Supervisory Patent Examiner (SPE) has approved of reopening prosecution by signing below.

2. This application has been examined. Applicant's arguments, see Appeal brief, filed on 9/5/08, with respect to the rejection(s) of claim(s) 1-24 under Bardour et al.

(6,318,828) in view of Ahne et al. (6,409,298) have been fully considered and are persuasive. Therefore, the final rejection has been withdrawn. However, upon further review and consideration, claims 1-24 are subject to restriction or election requirement.

Election/Restriction

3. Restriction to one of the following inventions is required under 35 U.S.C. 121:

Group I. Claims 1-7 and 13-19, drawn to a driver circuit for supplying firing pulse for firing the variable number of firing resistors, classified in Class 347, subclass 57;

Group II. Claims 8-12, drawn to method for maintaining nominally constant energy in a individual load during a firing cycle within a printhead, classified in Class 347, subclass 10; and

Group III. Claims 20-24, drawn to a driver circuit having a programmable offset generator, classified in Class 358 subclass 1.8.

4. The inventions are distinct, each from the other because of the following reasons:

Inventions I-III are related as subcombinations disclosed as usable together in a single combination, the single combination being a printhead. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, each of the respective inventions have been separate utility as in a system not having the others. See M.P.E.P. § 806.05(d).

5. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, each Group requiring a separate field of search (as demonstrated by the different arguments presented in the appeal brief), and their recognized divergent subject matter. restriction for examination purposes as indicated is proper.

6. A telephone call was made to Mr. Timothy Myers on 8/21/08 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the response to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed.

7. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 C.F.R. § 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a diligently-filed petition under 37 C.F.R. § 1.48(b) and by the fee required under 37 C.F.R. § 1.17(h).

8. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Gabriel I. Garcia whose telephone number is (571) 272-7434.
